SKILLS

Programming:	C++, JavaScript, C#
Frameworks:	HTML and CSS, .NET
Tools/Platforms:	Azure, AWS, SQL Server, Docker, Jenkins, Terraform, Prometheus, Grafana
Soft Skills:	Problem-Solving, Team Player, Project Management, Adaptability

PROJECTS

SecureShare .NET - Encrypted, Self-Destructing File Sharing System (GitHub)	February 2026 – March 2026
- Designed a modular backend using Clean Architecture and EF Core; implemented AES-256 stream encryption, GUID routing to prevent IDOR attacks, and an automated data self-destruct protocol. - Codified AWS infrastructure (VPC, EC2) using Terraform and engineered a declarative Jenkins pipeline automating multi-stage Docker builds and secure, zero-downtime SSH cloud deployments. - Integrated a full-stack Prometheus and Grafana monitoring suite, patching GitOps JSON schemas to enable dynamic container auto-discovery and real-time telemetry tracing. Tech: .NET, C#, EF Core, SQL Server, Docker, Jenkins, Terraform, AWS, Prometheus, Grafana.	
Resource Allocation Graph Simulator (GitHub)	July 2025 – August 2025
- Developed an interactive GUI tool to model process–resource allocation. - Implemented graph algorithms for cycle detection using NetworkX. - Enhanced understanding of deadlock detection and OS concepts. Tech: Python, PyQt5, NetworkX	
Fundraiser Planner- Website with integrated Gemini chatbot (GitHub)	March 2025 – April 2025
- Built a fundraising management platform integrated with an AI chatbot for planning, communication, and data insights. - Designed the frontend using Tkinter/React and backend with Flask/Django, while connecting to the Gemini API for intelligent responses. - Implemented multi-turn conversations, real-time suggestions, and secure API handling. Tech: Python, Tkinter/React, Flask/Django, Gemini API	

TRAINING

DSA with C++: Splen Technologies & Education Pvt. Ltd (Certificate)	June 2025 – July 2025
- Gained hands-on experience in implementing data structures (arrays, linked lists, stacks, queues, trees, graphs) and algorithms (sorting, searching, recursion, dynamic programming). - Improved problem-solving skills through competitive programming-style exercises. - Built optimized C++ programs applying concepts like time and space complexity analysis.	

CERTIFICATES

• Microsoft Azure Security Engineer Associate (Coursera)(Certificate)	September 2025
• Computer Communications (Coursera) (Certificate)	December 2024

ACHIEVEMENTS

LeetCode 100 Days Badge Achieved by solving 100+ coding challenges over consecutive days, highlighting strong problem-solving skills and proficiency in C++ Data Structures and Algorithms.
--

EDUCATION

Lovely Professional University <i>Bachelor of Technology - Computer Science and Engineering; CGPA: 7.71</i> Vedic Vidyashram Senior Secondary School <i>Senior Secondary; Percentage: 75</i> Vedic Vidyashram Senior Secondary School <i>Secondary; Percentage: 91</i>	Phagwara, Punjab Since August 2023 Tirunelveli, Tamil Nadu April 2021 - March 2023 Tirunelveli, Tamil Nadu April 2019 - March 2021
